# CERTIFICATES

Available in three different series, maturing after 5, 7 and 12 years. The yield is 3% 3.57% and 4.16% simple interest, respectively, at maturity. Thus, in the 12 year-certificates money increases by 50% on maturity. Interest is free of income-tax and super-tax and is not taken into account in arriving at the total taxable income.

The certificates are obtainable from Post Offices doing Savings Bank business in denominations of Rs. 5, 10, 50, 100, 500, 1,000 and 5,000. An individual can invest upto Rs. 25,000, and two joint holders upto Rs. 50,000/-.

Full particulars obtainable from Post Offices, District Organisers of the Small Savings Scheme, Assistant National Savings Officers, Provincial National Savings Officers, or the National Savings Commissioners, Simla.

Deposits accepted in multiples of Rs. 100/- upto a maximum of Rs. 25,000 for a single depositor and Rs. 50,000 for two persons jointly. Interest at 3½% per annum (free of all taxes and not taken into account in assessing the total taxable income) is paid or remitted to the depositor's address every year.

Deposits accepted at offices of the Reserve Bank of India at Bombay Calcutta, Delhi & Madras, and Branches of The Imperial Bank of India in other places transacting treasury business.

Full particulars obtainable from District Organisers of the Small Savings Scheme, Assistant National Savings Officers, Provincial National Savings Officers, or the National Savings Commissioner, Simla.

## REMARKS

The figures of births and deaths shown in this statement for week ending the 19th July, 1952, relate to 212 towns with an estimated population of 28,815 thousands. Information about Bihar could not be included. The total number of towns is 281 and their population is 34,764 thousands. Thus 75% of the total number of towns representing 83% of the total population is covered in this statement. The numbers of births and deaths recorded in these towns were 16,200 and 9,325 representing birth and death rates of 29.2 and 16.8 per thousand of population respectively.

(A) States (Parts A & C).—The data here relate to 184 towns with an estimated population of 25,552 thousands. The total number of towns is 235 and their population is 29,570 thousands. Thus 78% of the total number of towns representing 88% of the total population is covered. The numbers of births and deaths recorded in these towns were

14,290 and 8,478 representing birth and death rates of 29.1 and 17.3 per thousand of population respectively. The table at the end gives the position by States.

No town recorded a high death rate of 50 or over per thousand of population.

(B) States (Part B).—The data here relate to 28 towns with an estimated population of 3,263 thousands. The total number of towns is 46 and their population is 5,194 thousands. Thus 61% of total number of towns representing 63% of the total population is covered. The numbers of births and deaths recorded in these towns were 1,910 and 847 representing birth and death rates of 30.4 and 13.5 per thousand of population respectively.

No town recorded a high death rate of 50 or over per thousand of population.

## REMARKS

The figures of births and deaths shown in this statement for week ending the 26th July, 1952, relate to 201 towns with an estimated population of 26,306 thousands. Information about West Bengal could not be included. The total number of towns is 281 and their population is 34,764 thousands. Thus 72% of the total number of towns representing 76% of the total population is covered in this statement. The numbers of births and deaths recorded in these towns were 15,894 and 8,611 representing birth and death rates of 31.3 and 17.0 per thousand of population respectively.

(A) *States (Parts A & C).*—The data here relate to 179 towns with an estimated population of 23,188 thousands. The total number of towns is 235 and their population is 29,570 thousands. Thus 76% of the total number of towns representing 78% of the total population is covered. The numbers of births and deaths recorded in these towns were 14,452 and 7,695 representing birth

and death rates of 32.4 and 17.3 per thousand of population respectively. The table at the end gives the position by States.

Puri and Orissa was the only town which had a high death rate of 58.2 per thousand of population and this high death rate was mainly due to deaths from fevers.

(B) *States (Part B).*—The data here relate to 22 towns with an estimated population of 3,208 thousands. The total number of towns is 46 and their population is 5,194 thousands. Thus 48% of total number of towns representing 62% of total population is covered. The numbers of births and deaths recorded in these towns were 1,442 and 916 representing birth and death rates of 23.4 and 14.6 per thousand of population respectively.

No town recorded a high death rate of 50 or over per thousand of population.
